PROFILE

- Architected high-performance mobile applications using **Flutter** and **Dart**, scaling daily users to **50,000** while enhancing stability by **40%** through innovative API integration.
- Revolutionized user interaction by implementing real-time chat features with **Firestore Messaging**, driving user engagement up by **40%** and significantly improving overall satisfaction through optimized notifications.
- Streamlined data management architecture with **Bloc** and **MVVM**, reducing state update latency and boosting retention rates by **30%** through a more responsive application environment.
- Spearheaded custom UI component designs utilizing **Kotlin** and **Figma**, resulting in a **25%** increase in app engagement while ensuring aesthetic consistency across varied device types.
- Facilitated secure payment solutions through **Firestore Auth**, elevating transaction security levels and improving user login success rates by **25%**, essential for fostering user trust.
- Optimized backend services by integrating **RESTful APIs**, achieving a **30%** boost in application responsiveness and effectively resolving critical operational bottlenecks.

EXPERTISE

Mobile Development:	Android Studio, Flutter, Dart, Core Java
Architecture:	Bloc, MVVM, API Integration, REST
Database & Design:	SQLite, SQL, Figma, Logcat, Postman
Version Control:	Svn, Git
Testing:	CI/CD, Automated Testing, Agile
Soft Skills:	Leadership, Collaboration

WORK EXPERIENCE

Flutter Developer at ZaCharity Foundation March 2023 – Present

- Engineered high-performance dating app using **Flutter** and **Dart**, scaling active users to **50,000** and boosting stability by **40%** via modular design and API optimization.
- Led cross-platform development using **Flutter** and **Dart**, architecting scalable systems and executing **Agile** roadmaps to ensure timely feature delivery and stable app performance.
- Integrated **Bloc** state management in **Flutter**, optimizing reactive streams to cut state update latency and enhance code maintainability, improving user responsiveness.
- Collaborated with UI/UX teams using **Figma** to design precise **Flutter** interfaces, streamlining design handoffs and documentation to accelerate developer workflows.
- Developed real-time chat and push notifications using **Firestore Messaging**, increasing user engagement by **40%** through enhanced instant communication.
- Implemented secure authentication and profile management via **Firestore Auth**, raising login success rate by **25%** and reinforcing data security protocols.
- Designed custom UI components and animations using **Flutter SDK**, improving app fluidity and cutting load times by **20%**, enhancing user experience.
- Administered source control with **Git** and orchestrated **GitHub Actions** CI pipelines, automating build/test cycles to accelerate deployment and boost team collaboration.
- Optimized app performance with **Flutter** widget profiling and automated testing using **Flutter Test**, accelerating release cycles by **30%** and elevating code quality.

Android Developer at Tecogis software solution October 2022 – March 2023

- Engineered Android cargo app with **Kotlin** and **MVVM**, integrating **RESTful APIs** to enable real-time tracking and inventory control, streamlining operations by **30%** with scalable mobile architecture.
- Coordinated stakeholder alignment leveraging **Jira** and **Confluence**, defining project scope and steering Android roadmap to enhance deliverable synchronization and optimize **Agile** tracking workflows.

Android Developer at Truemedis July 2021 – August 2022

- Developed Kotlin Android app with **MVVM** enabling online/offline ordering and discount modules, boosting customer retention by **25%** and streamlining supply chains.
- Crafted accessible Android UI with **Kotlin** and **Jetpack Compose**, incorporating **Material Design** to optimize responsiveness and enhance medical staff workflow efficiency.
- Integrated barcode scanning using **ZXing SDK** and **Firebase**, accelerating supply tracking by **35%** and enabling real-time inventory updates.
- Architected expiry tracking system with **Firebase Cloud Messaging** and **Kotlin coroutines**, reducing supply wastage by **20%** and enabling timely stock rotation.
- Implemented real-time messaging using **WebSocket** and **Firebase Realtime DB**, increasing staff-supplier communication speed by **30%** and optimizing order processing.
- Orchestrated automated testing with **JUnit** and **Espresso**, achieving **99.9%** app stability and ensuring healthcare compliance for critical reliability.

Android Developer at StudioGraphy Pvt Ltd (LFC)

January 2021 – June 2021

- Engineered commission-based app using **Android SDK** and **Java**, enabling transactions across 5 categories, boosting user acquisition by **25%** and driving notable revenue growth
- Designed intuitive UI using **Android Jetpack** and **Material Design**, enhancing user engagement through adaptive layouts and responsive components across multiple Android devices
- Integrated **REST APIs** powering robust data sync between Android app and **MySQL** backend, ensuring secure, consistent persistent storage across platforms
- Implemented secure UPI gateway with third-party SDKs, ensuring **99.8%** transaction reliability and accelerating payments via end-to-end encryption on **Android**
- Deployed **Firebase Cloud Messaging** and **Firebase Analytics** to enable real-time notifications and background sync, increasing user engagement by **30%** through data-driven insights

Flutter Developer at Freelancing

January 2019 – December 2020

- Engineered **Flutter** cross-platform Android/iOS e-commerce app, expanding retailer user reach by **40%** and accelerating sales through seamless order processing and UI/UX enhancements
- Implemented **Flutter** authentication, payment, catalog, and cart features using **Firebase**, boosting app stability and driving **25%** smoother user experience
- Integrated real-time **Firebase** backend for data sync and analytics, improving data accuracy by **30%** and enabling faster decisions through advanced user engagement tracking

Android Developer at Optimum Financial Solution

January 2017 – December 2018

- Spearheaded GoDigital white-labeled app and website delivery using **Android SDK**, driving client base growth by **30%** and reducing onboarding costs by **40%** through scalable architecture and efficient delivery.
- Designed interactive UI using **Kotlin** and **Android SDK**, integrating **RESTful APIs** to boost responsiveness and engagement for **50K** monthly active users.
- Optimized background sync with **WorkManager**, implemented **Push Notifications** and **Firebase Analytics**, increasing user retention by **25%** and boosting engagement metrics across devices.
- Implemented **Chat SDK** and **Google Video Player** library in Android, enabling real-time multimedia communication with seamless playback, improving UX reliability and platform stability.

EDUCATION

HSC

January 2004 – Present

Dinar Inter college U.P Board

GPA: 61

Bachelor of Computer Application in B.C.A

January 2004 – January 2007

MCRP University of Bhopal

GPA: 66.32

CERTIFICATIONS

Java Certification
